This is the $x-t$ graph of the motion of a particle. Of the four points P , Q , R , and S , the velocity v_x is greatest (most positive) at

- A. point P . B. point Q . C. point R . D. point S .
E. not enough information in the graph to decide

Q2.3

Copyright © 2008 Pearson Education, Inc., publishing as Pearson Addison-Wesley.

This is the $x-t$ graph of the motion of a particle. Of the four points P , Q , R , and S , the acceleration a_x is greatest (most positive) at

- A. point P . B. point Q . C. point R . D. point S .
E. not enough information in the graph to decide

Q2.9

This is the v_x-t graph for an object moving along the x -axis.

Which of the following descriptions of the motion is most accurate?

- A. The object is slowing down at a decreasing rate.
- B. The object is slowing down at an increasing rate.
- C. The object is speeding up at a decreasing rate.
- D. The object is speeding up at an increasing rate.
- E. The object's speed is changing at a steady rate.

2-8 The "multiflash photograph" below shows a ball rolling along a surface. The camera flashed once a second, and the time is shown above each image.

Which graph below best represents the ball's *velocity* as a function of time?

E: none of these is remotely correct.

2-24 I drop a book at $t=0$. Which plot below best represents *position* as a function of time?

2-25 I drop a book at $t=0$. Which plot below best represents *velocity* as a function of time?

A:

B:

C:

D:
