

## So what do geologists do?

On Thursday, Geology is hosting the first in an occasional series of events that will help answer the question **“what do geologists do”**.

For this inaugural event, we have brought in two alumni Russ Abel '93 and Barret Cole '93 to have an informal conversation, over pizza, about environmental consulting and the path that these two geo grads took to become environmental consultants.

Russ is a Principal Geologist for Geosyntec, a mid-sized environmental consulting firm located in Portsmouth New Hampshire.

Barret is the President and COO of Sanborn Head and Associates a small sized environmental consulting firm located in Concord, NH

This event is aimed at all Geology students.

**Thursday October 20, 5-6 PM  
BEBU 100 (GEOL 111 lab room)**

...and did we mention that there will be Pizza!
