Campus Parking Reorganization associated with Greenway & Science Center Projects

Date Issued: May 21, 2015

Description of Impact:

Beginning June 1, 2015 campus parking will be reorganized to accommodate construction of the southern portion of the Greenway project. The following changes will occur:

- The parking lot immediately south of Seeley Mudd and McGuire will be closed.
- There will be no access to the Seeley Mudd loading dock.
- Merrill loading dock will be accessible by authorized vehicles only for deliveries coordinated in advance.
- O’Connell Parking Lot (corner of College and Dickenson at northeast corner of campus) will be changed from student to staff/faculty parking.
- Parking at the east end of the new South Campus Parking Lot (near the bike path) will be changed from student to staff/faculty parking.
- Alumni Parking Lot will be entirely staff/faculty parking.

Subsequent notifications will outline further changes in August including:

- New staff/faculty parking areas adjacent to Merrill and to the east of Wieland/King dorms.
- Other minor changes to be determined.

While every effort is being made to mitigate loss of parking near the core of campus, there will be reduced availability throughout the Greenway/Science Center construction period. The College recognizes the inconveniences associated with these changes. Campus Police and Facilities will monitor and make adjustments as is possible.

Date of Impact: June 1 – August 22, 2015

If you have any questions please call the Service Center, X-2254.
