

Amherst College  
Geology Department

## Weekly GEO-opportunities

December 1, 2021

### **GEO Department Events and Information:**

- SAVE THE DATE: Geology Department Holiday Gathering – Pizza Party: December 8 @ 12:00
- The Amherst College AWIS chapter invites you to its annual Internship Mixer on Sunday, December 5th from 6:30pm to 8:00pm in the Greenway A Ford Hall Event Space! This is a casual event organized for the purpose of providing a space for **any student of any STEM discipline** to connect with upper-class students looking to share their research internship experiences and internship application advice! We will be providing pamphlets with information about each speaker and a variety of appetizers from Oriental Flavor as well (vegetarian options available). Please contact [awisatac@gmail.com](mailto:awisatac@gmail.com) with any questions.

### **Geology Scholarships, Internships and Jobs:**

*Current opportunities that have been shared with the Geology Department. If you receive something you would like to share, please submit to [Diane \(dbhutton@amherst.edu\)](mailto:dbhutton@amherst.edu)*

- The American Geosciences Institute (AGI) would like to announce that the Harriet Evelyn Wallace Scholarship is now open for applications! The scholarship is available for female students pursuing a Master's or Doctoral degree at an accredited institution of higher education in a recognized geoscience program. Each scholarship award is \$5,000. For more information and to encourage your students to apply, please visit the [Harriet Evelyn Wallace Scholarship webpage](#).
- The American Geosciences Institute (AGI) announced that the Advancing Diversity in the Geoscience Profession Scholarship is now accepting applications. The scholarship is available for geoscience students entering a geoscience graduate program for the first time and identifies as a member of an underrepresented community (Black, Indigenous, Person of Color) and either a U.S. Citizen or permanent resident. For more information, [click here](#). (Deadline: February 13, 2022)
- The new AGeS-DiG (Diversity in Geochronology) pilot program will launch 2022. U.S. scientists at the senior, postdoc, and graduate levels are all eligible to apply for an AGeS-DiG award. Go to the [AGeS website](#) for more information. (Deadline: February 1, 2022)
- Brown University – DEEP Outreach (Department of Earth, Environmental and Planetary Sciences') has summer research opportunities available, learn more [here](#). (Deadline: February 1, 2022)

*Check out the Geology Department's [Summer research opportunities](#) for more listings*
