Fiona Anstey was recently selected as a Science Ambassador. [Watch](#) her award winning video submission. To learn more about the Science Ambassador Program and to apply, click [here](#).

On campus events and opportunities

The [Amherst's Association for Women in Science \(AWIS\)](#) group is hosting a breakfast for the Geology and Environmental Studies departments on Thursday, May 5th, from 8-10 AM in O'Connor Commons of Charles Pratt.

Event Description: [Sign up](#) to join Amherst's Association for Women in Science for lively morning chats with professors from STEM departments. Once you are signed up, you can stop by anytime between 8-10 AM! Breakfast will be available for to-go per COVID precautions. On Thursday, 5/5, you will be joining professors from the Biology, Chemistry, Physics, Astronomy, Geology, and Environmental Studies departments. On Friday, 5/6, you will be joining professors from the Math, Statistics, Psychology, Neuroscience, and Computer Science departments. You may [sign up](#) for both days of the event. Student sign-ups are **MANDATORY**.

*Note that this event is open to all regardless of gender or year.

Summer internships & Job opportunities

The Maryland Geological Survey has an opening for a [geologic field mapper](#) who will be primarily responsible for bedrock and surficial geologic mapping, identifying geologic hazards, and leading the mineral program in the State Geological Survey. This position is for a mid-career scientist who has a variety of field and office knowledge. The successful candidate will be able to work independently in mapping and field operations, have a firm understanding and use of GIS, understand the geology of Maryland, and be able to meet time and budget commitments. Read more and apply [here](#).

Save the Date

The Geology Department is planning a year-end celebration for Tuesday, May 17.
