TGIRx resumes TOMORROW!

1:00 PM in BEBU100

We will be hearing from Angelina Han and Petra Zuniga about their summer internships.

Important on-campus Information

[The Amherst College Museums Summer Internship Program](#) provides an immersive experience for students exploring a career in museums. The Emily Dickinson Museum, the Mead Art Museum and the Beneski Museum of Natural History will jointly award a limited number of internships, with preference given to students in the classes of 2024 and 2025. The internship is open to all students who are curious about museum work, with no previous experience required. Application deadline is March 1.

Summer internships & Job opportunities

[The Orleans Conservation Trust \(OCT\)](#) is hiring a summer intern. OCT is a non-profit land trust that has been protecting land in Orleans, MA for over 50 years. Our interns work side-by-side with staff and community leaders on land stewardship initiatives. OCT interns gain valuable professional experience and develop a passion to save open spaces. The intern will assist with land management needs and report to OCT's Director of Land Stewardship. The intern can expect to be involved with property inspections and maintenance, long and short-term land management planning, habitat management, property documentation, and volunteer engagement. OCT's summer internship program, now in its tenth year, is a terrific opportunity to get experience working for an environmental nonprofit and to build an understanding of land conservation. Position is open until March 4 or until filled. Full description and how to apply [here](#).

[The AGU Bridge Program](#) provides eligible students access to a free common geosciences graduate school application that is shared with our 40+ partners drawn from geoscience departments at universities and institutions around the country that adopt best practices in admissions and retention of students, create a welcoming culture within the greater Earth and space sciences community, and are striving to improve the geoscience education experience for all students. Deadline is March 31.

[The GREEN Program](#) is thrilled to open enrollment for our their new program - [Belize: Action for Sustainable Communities & Ocean Conservation](#)! Enrollment is now open for this 10-day program, and we hope you'll share this new opportunity with your students. Scholarships are available throughout February as well.

Please share your news & announcement with [me](#)
I would love to share them with the department!
