Important on-campus Information

AC Fellowships for Grad School Application Reminder Deadline is Feb. 10, 2022.

The [Amherst College Fellowships](#) are a collection of nearly 20 different funds established over the past 150 years by generous alumni donors of Amherst College. A short essay and the same letters your professors are already writing for graduate school are most of what you need to submit. Awards are based on financial need and academic merit. You do not need to already be accepted to a program, but you must be planning to attend in the 2022-23 academic year. Information is [here](#): Questions? Contact Suzanne Spencer (sspencer@amherst.edu)

Summer internships & Job opportunities

[Climate Adaptation Science Center](#)

The NE CASC is hiring an Climate Adaptation Science Center Intern. This position is being recruited across the level of senior undergraduate, recent graduate, or graduate student levels. Appointments will be considered at 20-40 hrs/week with a flexible schedule, for up to two years, depending on performance and availability of funds. To apply: Applications should include a 1) cover letter, 2) transcripts, 3) resume/C.V., 4) names and contact information of two references. Email application materials to Tanya Buxton Torres (tbuxtontorres@usgs.gov) no later than 2/25/22. Questions about the position can be directed to Katherine Smith (katherinesmith@usgs.gov), Michelle Staudinger (mstaudinger@usgs.gov) or Will Farmer (wfarmer@usgs.gov). Applications will be reviewed on a rolling basis until the position is filled.

[2022 RAY Diversity Fellowship](#)

The RAY Diversity Fellowship is a two-year, full-time placement with one of our partner conservation or clean energy organizations with the goal of increasing and facilitating environmentally-related career pathways for emerging leaders of color. Apply [here](#).

[Wildland Studies](#)

Has announced their NEW Summer Field programs. Check [them out](#).

[Earth and Atmospheric Sciences Department at Cornell University](#)

New internship program is a paid 9-week summer internship at Cornell called CorGGLE (Cornell Geopaths Geoscience Learning Ecosystem). This program is funded by the National Science Foundation GeoPaths program. [Learn more about the program](#) and apply by Feb. 15, 2022.
