Summer Water Meter Project June 28, 2019

Date Issued: June 28, 2019

Description of Work & Impact

This summer there will be Road work to install a new water meter and water pipe to serve the campus. This work will begin July 8th and end August 15th. The work area will be on east Drive from Facilities north into Route 9 (see image A). East Drive will be one lane wide during work hours but two-way traffic will be maintained through the use of flaggers at either end controlling traffic. Hours of on work activity (evenings and weekends) the road will be open to normal two-way traffic. The morning of July 29th the road will be closed in both directions; more specific notice will be issued proximate to the closure.

This work is highly weather dependent and some variation in the schedule should be expected. The road surface will include pavement, gravel and steel plates during the period, caution for bicycles is advised.

Accessibility Impact: Entrances to buildings will remain accessible. Sidewalks along East Drive will be accessible during this time except for the morning of July 29th.
