Seeley Mudd and McGuire Life Sciences
Egress Path Reconfiguration

Date Issued: May 22, 2015

June 1st through August 17th, the lowest level egress door at the Seeley Mudd loading dock and the lowest level egress door in the southwest egress stair in McGuire will not be operable. Safe travel distances within the buildings will not change.

- From the lower level in Seeley Mudd, once you’re in the egress stair, proceed half a flight up to the next egress door.
- From the lower level in McGuire, once you’re in the egress stair, proceed a flight up to the next egress door.
- The access corridor between Seeley Mudd and McGuire will be maintained.

The egress doors will be marked and re-signed according to the above information. No other egress changes are anticipated at this time. Pedestrian access to the McGuire lower level accessible entrance will be maintained with some modifications.

Construction work and activities will be happening immediately outside and adjacent to Seeley Mudd, McGuire and Merrill for this time period. It is a limited access, hard hat site with no pass through allowed.
