

Thank Goodness it Rocks 2017

TGiRx is starting up again this week! For those of you who are new to this, TGiRx is a weekly, informal get-together of students of the earth sciences (you!) on **Fridays, from 2:00 to 2:45 pm in Beneski Room 100** (the GEO 111 lab room).

Each week we gather, snack on some kind of yummy food (suggestions welcome), and hear from one or more of us on some work or experience of interest to everyone. This Fall, we will focus on student research – either the goals of projects getting underway or results from projects completed. In the Spring, we will hear about Study Abroad, Field Camp, Summer field work, and the results of the senior projects.

This week is a special edition of TGiRx, in which the faculty will discuss careers in Earth Sciences and how to get one – which is to say, all about going to graduate school. Even if you aren't a senior, this is important information for your thinking and planning. And if you are a senior, **this is a *MUST***.

At the end of this email there is a tentative schedule for Fall TGiRx presentations. If your name is on this schedule at a time you cannot accommodate – please get back to me immediately for adjustments.

Come one, come all! Seriously, COME! See you Friday.

On behalf of the Geology Faculty,

Tekla

DATE	SUBJECT	SPEAKERS
Sept 22	Grad School Meeting	Faculty
Sept 29	NO TGiRx	Yom Kippur
Oct 6	Senior Thesis Introductions	Becki Golia & Rowina Schnek
Oct 13	Senior Thesis Introductions	Matt Inabinett & Marie Maxwell
Oct 20	Senior Thesis Introductions	Eli Mansbach & Stefan Yong
Oct 27	Summer Field Work Report	The Bighorn Crew
